

## Section B13 Spinnaker Gear

### B13.1 Spinnaker Pole Adjusting Tackles

A Pole Adjusting Tackle enables the spinnaker pole to be raised and lowered on the mast if the mast is fitted with a Spinnaker Track (such as Part Nos. IMFT32 or IMFT32/2 - see Section 28.1) and Spinnaker Pole Slider. This is necessary for dip-pole gybing, assists effective trimming of the spinnaker, and enables vertical-stowage of the spinnaker pole.

The system consists of an endless loop rope from the top of the Slider up to the top end of the track, down to the bottom end of the track, then up to the bottom end of the Slider. Sufficient rope is provided in the loop to enable cleating (cleat is provided). The standard system is single-purchase and includes cheek blocks at top and bottom of the track. An alternative, necessary to handle the weight of bigger spinnaker poles, is double-purchase with roller blocks. A third alternative is the heavy-duty system which is usually used in conjunction with a mast-mounted Line Tender Winch (Part No. 491401).

DESCRIPTION	PART NO.	SUIT MAST SIZE
Pole Adjusting Tackle - single-purchase with cheek blocks	013.035	Up to IM22W
Pole Adjusting Tackle - double-purchase with roller blocks	013.034	IM22W and above
Pole Adjusting Tackle - single-purchase heavy-duty system	013.032	AYS235 and above

### B13.2 Spinnaker Fittings - Miscellaneous

PART NO.	DESCRIPTION	USE
013.008	Jockey Pole Ring	The ring is used for attaching a jockey pole to the mast. As such, one should be fixed to each side of the mast near the deck. The base plate has four holes, one at each corner, for fixing.
013.010	Spinnaker Pole Slider - heavy-duty	<u>All suit 32mm track (both IMFT32.A and IMFT32/2.A)</u> Includes vertical pin and bushing to suit Seldén knuckle
013.012	Spinnaker Pole Slider - with ring	With fixed ring to suit beak fitting on pole
013.011	Spinnaker Pole Track Stop	Prevents slider from coming off track end
013.070	Reducer 100 - 80	Allows 100mm spin. pole to use 80mm end fitting
013.080	Reducer 125 - 100	Allows 125mm spin. pole to use 100mm end fitting
013.401	Pole Stowage Bracket 80	Enables vertical stowage of the spinnaker pole on the mast; the bracket secures the bottom end; sized according to spinnaker pole diameter; anodised aluminium construction
013.403	Pole Stowage Bracket 100	
013.405	Pole Stowage Bracket 125	
013.021	Spectacle Fairlead Single	An alternative to a deflector block for a masthead spinnaker hoist; minimizes distance from sheave box to deflector whilst keeping halyard in line with sheave; can be either single (one spinnaker halyard only) or double (two spinnaker halyards); to be used with spectra halyard only
013.022	Spectacle Fairlead Double	

013.008

013.011

013.080

Jockey Pole Ring	Spinnaker Pole Track Stop	Reducer 100 - 80
